

Cold-Weather Teat Dips—No Prepay Necessary!

Cold weather and negative wind chills lead to chapped or cracked teats; which in turn, are more prone to infection. Make sure you're ready for the winter months with these specially formulated teat dips—designed to keep your cows' teats from freezing, chapping and cracking. Now's the perfect time to get them at great low prices! Call us for pricing and to order!

Winter Teat Dips	Active Ingredients	Emollient Amounts	Advantages	Proven Effective	Size
1% / 50% Winter Post Dip (Leedstone)	1% titrateable iodine	50%	Iodine kills bacteria on contact while the emollient helps heal damaged teat skin and protects against cold weather. 25% glycerin, 25% propylene glycol.	Prevents mastitis-causing organisms. Added conditioners prevent freezing and chapping of skin tissue. Contains 1% iodine, more than most competitors have (0.5%).	5 gal
					15 gal
					55 gal
Adverse Weather Teat Dip (GEA)	Fatty acid (caprylic-capric acid)	50%	2 skin conditioners to improve teat health in harsh weather conditions. Non-iodine formula kills mastitis-causing organisms.	Fatty acid teat dip provides excellent bacteria killing without fear of teat tissue irritation. Tough on bacteria, yet gentle on teats and milkers' hands.	15 gal
					55 gal
Derma-Kote® (GEA)	0.5% iodine	74%	Iodine kills bacteria on contact while the emollient helps heal damaged teat skin and protects against cold weather.	In an experimental study challenge, Derma-Kote has been shown to reduce intrammary infections by an average of 70% versus no teat dipping.	1 gal

					15 gal
DermaSept® (GEA)	Fatty acid (caprylic-capric acid)	76%	Shown superior gemicidal killing power versus popular 1% iodine. Heals teat tissue, reduces chance of frostbite and protects against bacterial invasion.	In an experimental study challenge, DermaSept has been proven to reduce new intrammary infections by an average of 71% versus no teat dipping.	55 gal
					1 gal
					5 gal
Recover™ (Chem-Star™)	1.5% heptanoic acid	78%	Gentle, effective formula provides year-round protection and a triple blend of emollients for superior teat conditioning. Fatty-acid based to provide protection against mastitis-causing pathogens.	Passes AOAC sanitizer test with greater than 99.9999% reduction in 15 seconds contact time; even in cases of 10% milk challenge.	15 gal
					5 gal
					55 gal
WINTERCARE™ (Ae-L Laboratories, Inc.)	1.0% capric/caprylic acids	74%	Specially formulated to protect teats from cold and wind; reduces frostbite. Ready to use. No premixing required.	Forms a non-freezable film on the teat to prevent microorganisms from entering the teat canal between milkings. Helps reduce chapping due to cold and wind.	2.5 gal
					5 gal
					15 gal
WinterSet™ (Dairy Health Products)	Chlorhexadine		Powder formulation will not cause chapping during the cold winter months. Features bacteriocidal and healing qualities.	A field study revealed 79% reduction of bacteria for teats treated with the liquid dip and 90% reduction for the powder.	55 gal
