

Colostrum Replacement for Kid Goats and Lambs

The best nutrition from the start.

Lambs and kids need colostrum on day one. LAND O LAKES® Colostrum Replacement for Kid Goats and Lambs provides the nutrition needed to get your herd or flock off to the best start.

LAND O LAKES® Colostrum Replacement for Kid Goats and Lambs is formulated to:

- Deliver consistent protection - Every batch of LAND O LAKES® Colostrum Replacement for Kid Goats and Lambs is tested by the USDA to aid in the treatment of failure of passive transfer before it enters the marketplace.
- Reduce risk of health challenges.
- Minimize variability in quality or quantity.
- Provide essential antibodies.
- Mimic pasteurized doe's and ewe's colostrum.^{1,2}

Colostrum Replacement for Kid Goats and Lambs

The necessary fuel.

Colostrum, or the first milk of lactation, supplies antibodies concentrated as immunoglobulins (IgGs) to newborn kids and lambs. These antibodies are essential for the immunity of newborn lambs and kids. This protection can only be received by consuming colostrum or colostrum replacement. Colostrum also provides high energy levels, immune factors and Vitamin A and E – all of which support a healthy start to the digestive and respiratory systems.

Feed kid goats and lambs colostrum replacement when:

- Quality or quantity of available colostrum is inadequate.
- Newborns are unable to suckle resulting from multiple births, first pregnancy dams or sick or weak dams.
- Ewes or does are suspected to be experiencing health challenges.

Feed Land O'Lakes Animal Milk Products' trusted line of nutrition to give your kids and lambs the nutrition they need from day one.
