#### ENVIRONMENTAL HAZARDS

scavenging mammals and birds might be poisoned if they feed upon animals that have and concealed places, between floors and walls, or in locations where signs of eaten this bait. Do not apply directly to water, or to areas where surface water is rodents have been seen. Protect bait from rain and snow. Remove as much present or to intertidal areas below the mean high water mark. Runoff also may be alternative food as possible. hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its at each bait placement.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for sites, pests, and application methods described on the label. bait placement. Retreat burrow entrances that are reopened by rats. If the IMPORTANT: Do not expose children, pets or nontarget animals to rodenticides. To area where treated burrows are located is accessible to children and nontarget help prevent exposure:

- 1. Store unused product out of reach of children and pets.
- 2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age and must be used in a manner that prevents such children from reaching into bait placements at intervals of 8 to 12 feet in infested areas. Larger placements, up compartments and obtaining bait. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait activity. stations are needed in areas open to hoofed livestock, raccoons, bears or other Baiting Strategy: Highest bait consumption is expected to occur on the first potentially destructive animals, or in areas prone to vandalism.
- 3. Dispose of product container and unused, spoiled or unconsumed bait as and replenish bait at sites where there is evidence of heavy feeding or where specified on this label.

Bait stations are mandatory for outdoor, above-ground use. Tamper- resistant bait stations must be used wherever children, pets, non-target mammals, or birds may have access to the bait placement location.

USE RESTRICTIONS: This product may only be used to control the following rodent pests in and around man-made structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat\* (Sigmodon hispidus). Eastern harvest mouse\* (Reithrodontomys humuli). Golden mouse\* (Ochrotomys nuttalli), Polynesian rat\* (Rattus exulans), Meadow vole\* (Microtus pennsylvanicus), White-throated woodrat\* (Neotoma albigula), Southern plains woodrat\* (Neotoma micropus), and Mexican woodrat\* (Neotoma mexicana). This product must be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops. Do

This product may be applied to active rodent burrows to control rats within or beyond 100 feet of buildings and man-made structures, provided that infestations of these rodents have been confirmed. Bait must be placed no less than 6 inches into active rat burrows. Do not broadcast bait. Because rat infestations may occur in areas farther than 100 feet from buildings and man-made structures when the rodents have ample supplies of food and cover, efforts should be made to remove food trash, garbage, clutter and

Do not place bait near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

Do not sell this product in individual containers holding less than 4 pounds of

SELECTION OF TREATMENT AREAS: Determine areas where rats, mice, or meadow voles\* will most likely find and consume the bait. Generally, these This product is extremely toxic to mammals and birds. Dogs and other predatory and areas are along walls, by gnawed openings, in or beside burrows, in corners

### APPLICATION DIRECTIONS:

Rats: Apply 1 to 6 ounces of bait per placement (usually at intervals of 15 to 30 feet). Adjust the amount of bait applied to the level of rat feeding expected

For treating burrows, use a long-handled spoon to place 1/2 to 1 ounce of bait deep into each active burrow entrance. Close burrows with soil 3 to 7 days after animals, check burrows every morning and evening to make sure that bait has not been pushed out of burrows. Remove and properly dispose of any bait that has become accessible to children or nontarget animals.

Mice and Meadow Voles\*: Apply 1/4 to 1/2 ounce of bait per placement. Space

day or two after treatment begins. After several days, inspect the placement there is continued evidence of rodent activity

Normally, the volume of bait consumed will be significantly less with bromethalin baits than with anticoagulant baits. Although one night's feeding will usually provide a lethal dose, maintain bait for at least one week to provide

# KILLS RATS, MICE, AND MEADOW VOLES\*

## KILLS ANTICOAGULANT RESISTANT NORWAY RATS, ROOF RATS AND HOUSE MICE

Norway rats, roof rats and house mice cease feeding after consuming a toxic dose.

ACTIVE INGREDIENT: Bromethalin (CAS #63333-35-7): 0.01% OTHER INGREDIENTS<sup>†</sup>:

EPA REG. NO. 12455-141-3240 EPA EST. NOs. 12455-WI-1k, 12455-WI-2P, 12455-WI-3W Superscript is first letter of the lot number.

APPLICATION DIRECTIONS (continued from other panel)

all rodents a chance to feed on the bait. Continue baiting until all signs of feeding

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Wearing gloves, collect and properly dispose of all dead, exposed animals and leftover bait. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish them as needed

### PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear shoes, socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

### FIRST AID

#### HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE IF SWALLOWED:

- Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.
- . Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or

### TREATMENT FOR PET POISONING

If an animal eats this bait, call a veterinarian at once.

### NOTE TO PHYSICIAN OR VETERINARIAN

Contains the nerve poison Bromethalin. This product is not an anticoagular type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

User Safety Requirements Follow manufacturer's instructions for deaning/maintaining PPE.

If no such instructions for washables exist, use detergent and hot

water. Keep and wash PPE separately from

other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing them. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

# STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal PESTICIDE STORAGE: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container by placing in trash, at an approved disposal facility or by incineration.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

\*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat
