

HORNET 2600

PRODUCT INFORMATION

Built to work as hard as you do!

Hornet 2600 Handle

The handle has an integrated battery meter and ON/OFF power, to prevent accidental discharge while saving battery life when not in use. Unlike most two-piece clamshell-designed handles, our one-piece sealed handle design ensures that it is ergonomically balanced and comfortable. Permanently sealed, maintenance-free, solid-state motor resists damage by dirt or moisture and is protected. This product also features rubber over-molding for shock absorption, comfort, and a slip-resistant exterior. Lastly, the integrated buttons are both comfortable and waterproof, preventing water from leaking inside the unit.

MAP Pricing is in effect please refer to your pricing sheet.

Rechargeable

Integrated Lithium-ion battery saves time and money without the cost of disposable alkaline batteries. USB charging brick not included.

Flexible Interchangeable Shaft

Our shafts are built to be flexible and can bend nearly 180 degrees. Shafts are not warranted against normal wear and tear. Only against manufacture defects

Water Resistant

The sealed handle and integrated buttons allow the use of our livestock prod in almost any weather condition.

Hornet 2600 Features

Rubber Over Mold Handle

This product also features rubber over-molding for shock absorption, comfort, and a slip-resistant exterior. Lastly, the integrated buttons are both comfortable and waterproof, preventing water from leaking inside the unit.

1 One Piece Design

The one-piece sealed handle design ensures that it is ergonomically balanced and comfortable. Permanently sealed, maintenance-free, solid-state motor resists damage by dirt or moisture.

Built to work as hard as you do!

EZ Warranty

We offer a 12-month warranty on the **Hornet 2600 Handle ONLY** from the purchase date. We only warranty against manufacture defects. Customers must register by filling out the warranty card inside and keep the receipt of purchase. Should you have questions or need assistance contact our customer service at 806-340-7664. Customers with warranty issues are encouraged to contact customerservice@herculesag.com or call our office. See Warranty Guide for further information.

FAQ's

How long will the battery charge last?

Depends on how much you use it and what you use it for. We typically tell people it will be at least a few months between charges.

How do you know if it is charging?

The charging cord has a light built in. The red/orange light unit is charging and the green light means charged.

Does the battery meter trickle down?

No, you will know when to charge it when the red light is the only light showing. A fully charged unit shows 1 red light with 3 green lights. When the greenlight turns off there is about 20% battery left.

Are they waterproof?

Our unique one-piece handle and molded buttons are designed to keep water from leaking inside. We consider them to be water resistant not waterproof.

What about battery care and charging?

Lithium-ion works best when you deplete the battery and then charge it until the battery is fully charged. Leaving the unit on the charger will weaken the battery life.

What about cold temperatures?

Lithium batteries can be used and discharged in cold weather without damaging them. However, you don't want to charge your battery in temperatures below 40 degrees Fahrenheit. We recommend that you only charge your battery between 40 and 100 degrees. It is important to get your battery out of the freezing zone before charging it. When using in cold temperatures, be sure to warm up the battery by holding down the trigger button for about 30 seconds.

How "hot" is it?

The Hornet 2600 handle has a max output of 10-12,000 volts. This information is on the end of the handle.

Are the shafts proprietary or interchangeable with other brands?

Our shafts are proprietary only to HerculesAG and not interchangeable with other brands. Please **only use HerculesAG shafts with the Hornet 2600 handles.**

Is the shaft flexible?

Yes, they are super flexible and not brittle. Our shaft can bend 180 degrees and return to shape. While the shafts are flexible, we only warranty manufacture defects and not normal wear and tear.
