

LIQUID

# BoviDrops®

Sustained Immune Support | Vitamins A, D<sub>3</sub> and Omega 3

Liquid BoviDrop® deliver key ingredients for sustained support through challenges.

BoviDrops are formulated to provide support for a healthy immune system as cows go through the normal stresses of the production cycle. Adding BoviDrops to a healthy diet can help animals live up to their genetic potential, which is why BoviDrops are a pivotal component of Van Beek's Fresh Cow Program.

### Directions For Use

Dairy Cows	20 ml	Feed 7 days before calving or at freshening, and 7-10 days prior to breeding
Beef Cows	10-20 ml	Feed prior to calving and breeding
Heifers and Bulls > 500 lb	10 ml	Feed while shipping, receiving, vaccinating and during other periods of stress
Heifers and Bulls < 500 lb	5 ml	Feed as needed and during periods of stress

### Use Liquid BoviDrops to support cows through the normal stresses of the production cycle:

- Extremely high production
- Twin calves
- Poor cleaning
- General health
- During breeding
- Pre-calving & during calving
