

## APPLICATION INSTRUCTIONS

1. Clean and prepare hoof, creating a flat surface.
2. Apply Bohning® Block with a two-part epoxy glue, following glue specifications. (There is no need to heat block).

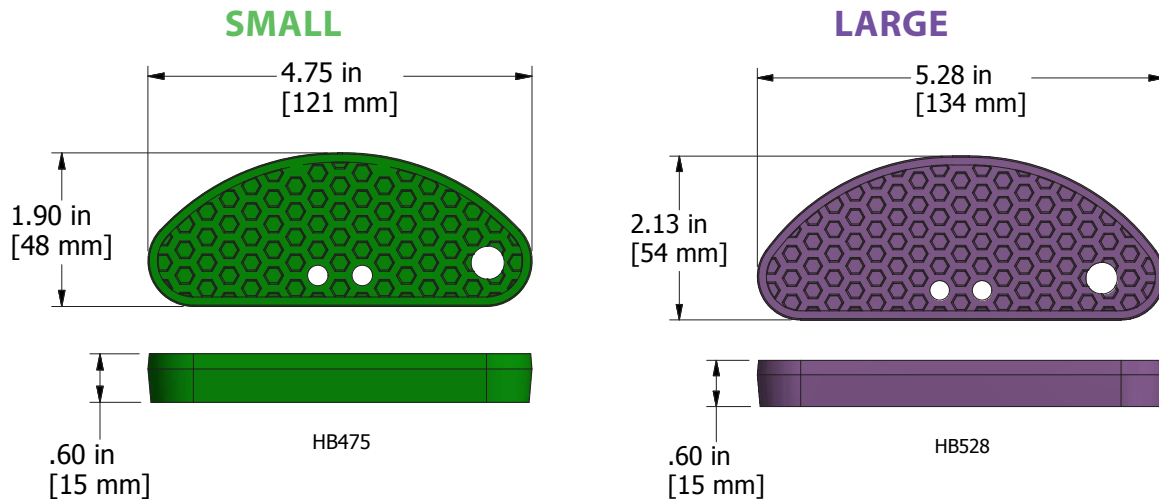

## BOHNING® BLOCK ADVANTAGES

- **STAYS PUT.** Honeycomb pattern creates an ultra-strong bond with the glue and prevents glue waste.
- **NO HEATING NECESSARY.** Our manufacturing process leaves no oily residue so you don't have to waste time burning it off before application.
- **DURABLE.** Lasts up to 3 months in high-wear environments.
- **MADE IN USA.**
- **BI-DIRECTIONAL USE.** Can be flipped to be used on either side of the hoof.
- **HANGABLE.** Lanyard hole incorporated for easy access.
- **FREE SHIPPING.** On orders within the contiguous U.S.
- **TWO SIZES AVAILABLE.** Small (*Green*) & Large (*Purple*).

<b>HB528-250</b>	<b>5.28 Large Block, (Purple), 250 pack</b>	<b>\$625.00</b> ( <i>\$2.50 per piece</i> )

## HOW THE BOHNING® BLOCK WAS DEVELOPED

The Bohning® Block was developed with the cooperation of hoof trimming experts. These trimmers often encountered issues with standard plastic hoof blocks: the blocks did not adhere well to the hoof despite proper preparation, creating extra work for the trimmers and frustration for the farms they serve. Over the course of several months, these hoof trimmers worked with Bohning's in-house team of engineers and material specialists to design and develop the material used in the Bohning® Block. Manufactured entirely at the Bohning Co. in Lake City, Michigan, the Bohning® Block has the right features to ensure great adhesion and durability.

## ABOUT THE BOHNING COMPANY

The Bohning Company has been located in Lake City since its founding 75 years ago. Developing and manufacturing high-quality products that solve problems for local industries, then extending these solutions globally, is a foundation of our company. Northern Michigan is home to some of archery's greatest legends, so the area was a natural fit for Rollin Bohning, a chemist and avid archer. Bohning continues to apply its expertise in plastics and adhesives to serve a wide variety of local industries including fishing and golf. We are very proud to continue that tradition with the introduction of a product that solves problems for the numerous dairy farms in our area and around the world.
