

The dosing revolution has begun.

# THE NEW EasyDose Gun

---

The future of livestock dosing  
is in your hands - literally.

*The EasyDose™ Gun from Te Pari is the easiest Pour On applicator on the market.  
Designed to reduce hand strain with all day comfort. Perfect for any operation.  
Ladies and kids love it, too.*

# Easy Dose Gun

The EasyDose Gun is a standalone battery powered applicator for pour on, drenching or injecting. This Gun reduces hand strain and makes treatments faster and easier.

## HOW IT WORKS

The battery-powered electric motor drives the piston forward and back. The operator can adjust the delivery and refill speeds to suit the situation. A single power unit can be fitted with either a 70ml, 14ml or 6ml barrel, making the dosing gun a truly multipurpose device.

## SPECIFICATIONS

**70ml barrel:** This barrel is designed for pour on and oral drenching. Doses of 5ml to 300ml. Dose volume increments of 1ml. Volumes from 71ml to 300ml delivered in up to five sequential shots.

**Sequential shots:** If the dose is larger than the barrel size then the gun will automatically divide the total dose into equal parts.

**Dose Accuracy:** +/- 0.2 mm

**Battery Life:** 2,000+ doses of 50ml pour on/1000+ doses of 3ml injection

## BARREL OPTIONS

Purchased Separately

**14ml barrel:** This barrel is designed for injecting and oral drenching of smaller doses. Doses of 1ml to 28 ml. Dose volume increments of 0.5ml. Volumes from 14.5ml to 28ml delivered in two sequential shots.

**6ml barrel:** This barrel is a dedicated for injectable medications featuring a tube draw off or bottle mount and a safety locking shroud. Doses of 1ml to 12ml. Dose volume increments of 0.1ml. Volumes from 6ml to 12ml delivered in two sequential shots.

## FEATURES

- Adjustable piston forward and return speed
- Statistics functions
- Multiple barrel options
- Durable construction
- Firmware updates through smart phone app
- Dosage used and number of treatments displayed on statics screen
- Lock screen prevents accidental dose adjustment

## CASE STUDY

### Charm Gaines

*Miami OK*

As the years have flown by, my hands became badly damaged from repetitive movements when we worked cattle. Pulling up meds in shots, administering the meds, and squeezing the cattle wormer guns to spread the wormer over the cattle all contributed to permanent damage to my hands. Thumbs were the most affected. After several years I stumbled upon the Te Pari gun. It all seems like a no brainer. Hands prematurely breaking down and causing restrictions with my life OR switch from manual work to a Te Pari gun.

The first time we worked a herd of cattle after purchasing the Te Pari gun, I was literally stopped in my tracks! That pretty much says it all...

Call us on **800 315 0433** for more information on how to set up a Dosing Gun to your requirements.
