

IntegriVIX / CATTLE PELLET

Supplemental Feed Additive for Cattle

IntegriVIX Cattle Pellet is a supplemental feed additive designed to support beef and dairy cattle through varied events during the production life cycle. IntegriVIX's phytogenic blend is designed to encourage optimal health by supporting the integrity of an animal's microbiome while supporting a healthy appetite and feed utilization.

Directions For Use:

Preweaned Calves: Feed 1 oz per head per day for at least 7 days.

Postweaned Calves and other Cattle Categories: Feed 2 oz per head per day for at least 28 days.

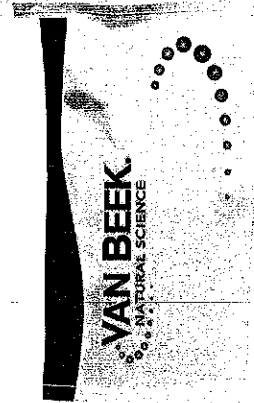

For situations that require enhanced support, feed 1oz per 100 lbs for 5 days. Do not exceed 14 days of increased feeding rate.

When possible, begin feeding 7 days prior to an expected event like weaning, regrouping, or other environmental conditions.
