Remote Lubrication System

For Belt Drive Fans

Bearing Maintenance Made Fast & Easy

The Remote Lubrication System provides easy accessibility and a hassle free approach to maintaining the bearings on your fans.

The Remote Lubrication System is designed with grease fittings placed on the outside of the fan housing so the bearings can be easily greased without the need to remove the shutter or reach through the outlet guard.

Schaefer's factory- or field- installed Remote Lubrication System will save your company time and money through lower maintenance costs.

Part Numbers:

REMOTELUBE-INST: Factory installed

REMOTELUBE-KIT: For field installation
