# THE WINNING COMBINATION

## POWERFUL FEED ADDITIVES THAT DON'T REQUIRE A VFD

**Fight Strong® for Cattle Pellet** is fed during high-stress situations to get cattle started and followed with **Microfused® EO 100 Mini Pellet** fed daily to keep cattle going.

### WHEN THE STRESS IS ON

#### **FIGHT STRONG® FOR CATTLE PELLET**

**Fight Strong® for Cattle** pellets are fed for 28 days to help cattle overcome intense production stress and is powered by patented technologies to stimulate rumen function and promote gut health.

GET 'EM STARTED

### ENHANCE HEALTH & PERFORMANCE

#### **MICROFUSED® EO 100 MINI PELLET**

Powered by patent-pending **Microfused® Essential Oils** technology that naturally promotes gut health and helps reduce pathogen load through broad antimicrobial activity. Outstanding antioxidant capacity results in less oxidative stress and more energy for production.

KEEP 'EM GOING

### HELPS OVERCOME STRESS RELATED TO:

- Transition
- Weather
- Disease pressure
- Poor appetite
- Environment

### DIRECTIONS FOR SUCCESS

TIMES OF STRESS	
<b>FIGHT STRONG® FOR CATTLE PELLET</b>	28 Days
<b>MICROFUSED® EO 100 MINI PELLET</b>	Feed Continuously or Pulse Monthly

### REPORTS FROM THE FIELD

Producers who use this combination report:

- Enhanced gut health
- Optimal immunity
- Cattle stay on feed
- Superior respiratory health
- Enhanced foot health
- Promotes performance
- Less cattle pulled

### VANDER WAAL FEEDLOT

**5,000-head feedlot in northwest Iowa**

“Since we started feeding **Fight Strong® for Cattle Pellet** and **Microfused® EO 100 Mini Pellet**, we have fewer health challenges to deal with. This year, we pulled less than half the cattle we typically do, and had very good feed intake, despite variations in temperature and summer heat. Our cattle were healthier through the summer months, and we also have no hairy heel wart and minimal foot rot.”
